## **NetOpt to Distribute SYSWAN Technologies DUAL and OCTO WAN Load Balancing routers**

**BRISBANE, Australia – March 05, 2008** – NetOpt has signed an **exclusive deal** to distribute and support SYSWAN Technologies Dual and Octo WAN routers in Australia and New Zealand. SYSWAN Technologies is headquartered in Oregon, USA.

“We are very pleased to have secured the distribution rights for SYSWAN Technologies products. SYSWAN offers healthy margins for resellers and retailers together with world class support” said Rick Nand. “We have launched an aggressive program to recruit and build relationships with resellers. Our goal is to utilise a 100 percent channel model. We are on a recruitment drive for VARS and Systems Integrators across Australia and NZ”. he said.

“At SYSWAN Technologies we strive to provide the best to our customers and partners. Having NetOpt as our new exclusive distribution partner helps us continue that goal of providing excellent products, support, and ease of procurement. We are very proud to have such a reputable company such as NetOpt representing us in the Australia, New Zealand, and Fiji regions.” Said Erik Shunn, President of SYSWAN Technologies.

SYSWAN Technologies Duolinks and Octolinks high-performance Multi WAN routers ensures greater Internet availability with state-of-the-art automatic redundancy, bandwidth load balancing, security and improves quality of service for mission critical applications. The routers are easy to install with flexible network configuration capabilities. More businesses are relying on Internet connectivity for their day to day operation. SYSWAN Technologies routers offer scalability, security and fast connectivity.

The SYSWAN VPN Client is a software implemented IPSec VPN solution that allows remote, mobile and home users to establish a secure and efficient connection to corporate networks over the Internet by creating point-to-point encrypted VPN tunnels. This on-demand IPSec VPN Client is compatible with all SYSWAN WAN routers and can also be interoperable with other IPSec VPN gateway products when needed to be used in a multi-vendor environment.
