**BRISBANE, Australia – February 27, 2008** – TRITTON Universal Xtreme Docking Station (XDS) which was first launched in January at CES 2008 is now available in Australia. The XDS, a Universal docking station for all makes and models of laptop computers was launched today by TRITTON's, Brisbane based exclusive distributor; NetOpt.

Simply connect your Ethernet, monitor, keyboard, mouse, speakers, microphone and any other USB peripheral with a single USB cable. The XDS is the perfect solution to expand your laptop into a full size workstation and maximise your viewing capabilities with the built-in TRITTON patented SEE2 port. SEE2 supports extended, mirrored or desktop mode where a user can extend the viewing area or open attachments on one screen while viewing documents/email on another or view video/TV on one screen and your desktop on the other.

"Laptop sales have overtaken desktop sales especially in the consumer area. The latest figures released by IDC in Computerworld last week showed that the laptop sales to consumer/home user segment was up by 32% for Q1-Q3 2007 when compared with Q1-Q3 2006. The XDS is a universal docking station, very easy to use and creates a full workstation. It can be also be bundled with laptops." Said Rick Nand.

More information on XDS and other TRITTON range launched today can be found at [www.netopt.com.au](http://www.netopt.com.au)
